

Press Release

Fleets urged to help save lives

Fleetcraft Driver Training Limited is supporting the 'National Road Safety Week' (7-13 November 2005).

This annual event, co-ordinated by the road charity 'BRAKE' is aimed at raising awareness among millions of road users, but especially fleet operators and drivers.

Companies are being urged to implement educational incentives and year-round road safety monitoring.

In addition, Fleetcraft uses this campaign, as an opportunity to make its annual reminder about changing daylight hours and adverse weather conditions. Drivers should adjust driving habits, speed and increase regular checks on lights, tyres and windscreen wipers.
